

TABLE OF CONTENTS

1. Robmech

1-1 Contactless Yagi-Patch Electrodes for Electroencephalogram (EEG) headsets, to be used for Robotic Applications	1
<i>Riaan Stopforth and Shaniel Davrajh</i>	
1-2 Joint Stiffness and Link Deflection Identification of Serial Robotic Manipulators and End-Effectors	6
<i>Akshay Singh, Dr. Jared Padayachee and Prof. Glen Bright</i>	
1-3 Development and Performance Evaluation of Automated Irrigation System	12
<i>Lanre Daniyan, Ilesanmi Daniyan, Khumbulani Mpofu and Boitumelu Ramatsese</i>	
1-4 A Review of Collaborated Educational Drone Development and Design at the BRICS 2018 Future Skills Challenge	17
<i>Christian Basson, Sahil Hansraj, Riaan Stopforth, Paul Mooney, Russel Phillips, Theo van Niekerk and Karl du Preez</i>	
1-5 Gamification and Game Development for Educational Agile Operations Management in Robotics Research	23
<i>Christian Basson, Wesley Dharmilingum, Clydene Reddy, Akshay Singh and Riaan Stopforth</i>	
1-6 Propagation Delays and Data Integrity of Cellular and WiFi Networks from IOT devices to cloud storage	29
<i>Wimpie van der Merwe, Pierre Hertzog and Arthur Swart</i>	
1-7 A Distributed Framework for Programming the Artificial Intelligence of Mobile Robots in Smart Manufacturing Systems	34
<i>Nicol Naidoo, Glen Bright and Riaan Stopforth</i>	
1-8 Optimal Paths for a Mobile Manipulator using the Leapfrog Method	42
<i>Belinda Matebese, Daniel Withey and Mapundi K. Banda</i>	
1-9 Systems Development of a Two-Axis Stabilised Platform to Facilitate Astronomical Observations from a Moving Base	49
<i>James Hepworth and Hendrik Mouton</i>	
1-10 Design and construction of a self-levelling tricopter using gain scheduling and PID controllers	56
<i>Ian Jannasch and Deon Sabatta</i>	
1-11 Using Gaussian Process Regression for the interpolation of missing 2.5D environment modelling data	62

Samuel Ogunniyi, Dan Withey and Stephen Marais Marais

1-12 Towards improving incremental learning of manipulator kinematics with inter-robot knowledge transfer 68
Ndivhuwo Makondo and Benjamin Rosman

1-13 Human-Robot Interaction Safety: Research and Design of a Human Proximity Sensory System Utilizing a Mobile Phone Application to Convey Data to an I/O Robotic Controller 74
Gareth Hoskins, Jared Padayachee and Glen Bright

1-14 Detection and analysis of low frequency vibrations to determine their sources in a water medium 80
Shane Schoonveldt and Ben Kotze

1-15 Facilitation by using Robotics Teaching and Learning 86
Floris Niehaus, Ben Kotze and Adam Marais

1-16 Solar Irradiance Model for the South African Solar Challenge 91
Gareth A. Gericke and Nicolaas Luwes

1-17 An overview of robot vision 98
Beatrice van Eden and Benjamin Rosman

1-18 Wireless Power Transfer for LoRa Low-Power wide-area Networks (LPWANs) 105
Molefi Makhetha, Elisha Markus and Adnan Abu-Mahfouz

2. PRASA

2-1 DepthwiseGANs: Fast Training Generative Adversarial Networks for Realistic Image Synthesis 111
Mkhuseli Ngxande, Jules-Raymond Tapamo and Michael Burke

2-2 A comparison between fully connected and deconvolutional layers for road segmentation from satellite imagery 117
Dhruv Bhugwan, Pravesh Ranchod, Richard Klein and Benjamin Rosman

2-3 BLSTM harvesting of auxiliary NCHLT speech data 123
Jaco Badenhorst, Laura Martinus and Febe de Wet

2-4 Image Stitching for Usage in Photogrammetric Algorithms 129
Gene Stoltz

2-5 Multi-Class Weather Classification from Still Image Using Said Ensemble Method	135
<i>Gbeminiyi Ajayi and Zenghui Wang</i>	
2-6 Automatic Speaker Recognition System based on Machine Learning Algorithms	141
<i>Tumisho Billson Mokgonyane, Tshepiso Joseph Sefara, Thipe Isaiah Modipa, Mercy Mosibudi Mogale, Madimetja Jonas Manamela and Phuti John Manamela</i>	
2-7 Enhancing edge-based image descriptor models through colour unification	147
<i>Dumisani Kunene and Vusi Skosana</i>	
2-8 Image processing towards the automated identification of nanoparticles in SEM images	153
<i>Nicolene Botha, Gert Wessels, Natasha Botha and Beatrice van Eden</i>	
2-9 Evaluating Open-source Toolkits for Automatic Speech Recognition of South African Languages	160
<i>Ashentha Naidoo and Mohohlo Tšoeu</i>	
2-10 Towards an unsupervised morphological segmenter for isiXhosa	166
<i>Lulamile Mzamo, Albert Helberg and Sonja Bosch</i>	
2-11 An Objective MOS Prediction Approach Based on the Nb Interface Parameters	171
<i>Lisungu Oteko Tresor, Mampaka Maluambanzila Minerve and Sumbwanyambe Mbuyu</i>	
2-12 Image Compression-Encryption Scheme Based on 2D DWT, SPIHT and Qi Hyper-chaos	177
<i>Lisungu Oteko Tresor and Sumbwanyambe Mbuyu</i>	
2-13 Segmentation of Optic Cup and Disc for Diagnosis of Glaucoma on Retinal Fundus Images	183
<i>Afolabi Oluwatobi, Fulufhelo Nelwamondo and Gugulethu Mabuza-Hocquet</i>	
2-14 CREAK descriptor evaluation for visual odometry	188
<i>Dehan Smulders, Kenneth Uren, George van Schoor, Corné van Daalen and Japie Engelbrecht</i>	
2-15 Performance evaluation of sampling-based large-scale clustering algorithms	194
<i>Peter Olukanmi, Fulufhelo Nelwamondo and Tshilidzi Marwala</i>	
2-16 PAM-lite: fast and accurate k-medoids clustering for massive datasets	200
<i>Peter Olukanmi, Fulufhelo Nelwamondo and Tshilidzi Marwala</i>	
2-17 The effect of word embeddings and domain specific long-range contextual information on a Recurrent Neural Network Language Model	205

Linda Khumalo, Georg Schlunz and Quentin Williams

2-18 A comparison of skin detection algorithms for hand gesture recognition 211
Ken Nixon, Timothy McBride and Nabeel Vandayar

2-19 Low Cost Hand Gesture Recognition System Design and Implementation 217
Nabeel Vandayar, Timothy Mc Bride and Ken Nixon

3. SAUPEC

3-1 Comparison of Different Wind Speed Prediction Models for Wind Power Application 223
Temitope Ayodele, Richard Olarewaju and Josiah Munda

3-2 A Support Vector Machine Based Fault Diagnostic Technique In Power Distribution Networks 229
Katleho Moloji and Adedayo Ademola Yusuff

3-3 Application of static var compensators with harmonic filters in the heavy industry 235
Nkululeko Motlanthe and Lutendo Muremi

3-4 An Improved Load shedding technique for optimal location and profitability for contingency conditions 241
Ntombizotwa Memane, Josiah Munda, Olawale Popoola and Yaskandar Hamam

3-5 Electrical and Physicochemical Properties of Persea Americana Oil as an Alternative Transformer Insulation Oil 247
Benard Makaa, George Irungu and David Murage

3-6 Improving Reliability on Distribution Systems Using BPSO for Device Placement 253
Rianta Bhugwandeem and Akshay Kumar Saha

3-7 Robust Torque Ripple Mitigation of a Line-Start PMSM by Means of the Taguchi Method 259
Albert Sorgdrager, Rong-Jie Wang and Andre Grobler

3-8 Class attendance and performance of undergraduate electronic engineering students: exploring the effects of gender 265
Bernard Tonderayi Mangara

3-9 Optimising the Design of a Hybrid Power Supply Using a Genetic Algorithm 269
Francisca Daniel and Arnold Rix

3-10 Development of in-phase bus transfer scheme using Matlab Simulink 275
Vonani Clive Mathebula and Akshay Kumar Saha

3-11 Modelling of a MMC HVDC Link between Koeberg Power Station and Cape Town - Experiences in simulation	281
<i>Ryan Lobban and David Dorrell</i>	
3-12 Detecting Anomalous Events for a Grid Connected PV Power Plant Using Sensor Data	287
<i>Wayne Dyamond and Arnold Rix</i>	
3-13 Coal fired power plant in-phase bus transfer simulation of forced and induced draught fan motors	293
<i>Vonani Clive Mathebula and Akshay Kumar Saha</i>	
3-14 Application of Artificial Neural Network for Fault Recognition and Classification in Distribution Network	299
<i>Adeniyi Onaolapo and Kayode Akindeji</i>	
3-15 Recloser placement on medium voltage distribution networks	305
<i>Renaldo Strydom and Pierre Hertzog</i>	
3-16 Reduction of Inverter-Induced Shaft Voltages Using Electrostatic Shielding	310
<i>Stiaan Gerber and Rong-Jie Wang</i>	
3-17 Design Strategy of Traction Induction Motors	316
<i>Thamsanqa Masuku, Rong-Jie Wang, Marne Botha and Stiaan Gerber</i>	
3-18 Effects and Performance Indicators Evaluation of PV Array Topologies on PV Systems Operation Under Partial Shading Conditions.	322
<i>Peter Gbadega and Akshay Saha</i>	
3-19 Electrical Characteristics Improvement of Photovoltaic Modules Using Two-Diode Model and its Application Under Mismatch Conditions.	328
<i>Peter Gbadega and Akshay Saha</i>	
3-20 A Case for Optical Pollution Monitoring of Bushings	334
<i>Filipe Fernandes, John Van Coller and Nishal Mahatho</i>	
3-21 Design of a low cost multi-module capacitive IV curve tracer for PV module mismatch characterisation	340
<i>Ian Reischauer and Arnold Rix</i>	
3-22 Hardware-In-Loop Testing of a Differential Relay Used To Protect Single/Double Circuit Transmission Line	347
<i>Tumiso Ledwaba, Karabo Senyane and John Van Coller</i>	
3-23 Identification of Vibration Sparking in a Large Hydrogen-Cooled Generator Winding	353
<i>Gomotso Phokojoe and John Van Coller</i>	
3-24 Design Strategy and Comparison of Four PM Motor Topologies for a 2 kW Traction Application	358
<i>Stavros Pastellides, Stiaan Gerber and Rong-Jie Wang</i>	

3-25 Analysis and Redesign of Protection System for a Sugar Company	364
<i>Nikhil Ganas and Kayode Akindeji</i>	
3-26 An Investigation into the Effect of aging components on the Medium Voltage network configurations in the Semi-Urban Areas	370
<i>Nosi Mpelo and Pierre Hertzog</i>	
3-27 Dynamic load-shedding for enhancement of power system stability for the Lesotho 132 kV transmission network	376
<i>Ikaneng Raphoolo and Jan de Kock</i>	
3-28 Irradiance modelling of bi-facial PV modules using the ray tracing technique.	383
<i>Jobert Louw and A.J. Rix</i>	
3-29 Load Compensation in A Three-Phase Four Wire Distribution System Considering Unbalance, Neutral Current and Power Factor Improvement	389
<i>Alaba Ojo, Kehinde Awodele and Adoniya Sebitosi</i>	
3-30 Auto-Restoration back-feeding using an Automated Normally Open (N/O) point on Medium Voltage (MV) Networks for the functionality of the Fault Location, Isolation and Service Restoration (FLISR)	395
<i>Fundiswa Mthethwa and John Van Coller</i>	
3-31 Comparative Analysis of the Fault Ride-Through Capabilities of the VSG Methods of Microgrid Inverter Control under Faults	400
<i>Elutunji Buraimoh and Innocent Davidson</i>	
3-32 Simulation-based analysis of the anti-islanding requirement specified within the Grid Connection Code for Renewable Power Plant (GCCRPP)	406
<i>Chaniel Precious Allessing, John Van Coller and Hannes Kruger</i>	
3-33 Utilisation of Line Surge Arrestors to Improve Overhead EHV AC Line Performance under Lightning Conditions	412
<i>Eddie Singh and Innocent Davidson</i>	
3-34 Three-Phase Five-Limb Transformer Harmonic Analysis Under Dc-Bias	420
<i>Talent Tafadzwa Murwira, Sizwe Mkhonta, David T. Oyedokun, Komla A. Folly and C. T. Gaunt</i>	
3-35 The Effect of A Phase Shift Transformer For Power Flow Control	425
<i>Mancoba Senzangakhona Thwala, Agha Francis Nnachi, Katleho Moloji and Aloys Oriedi Akumu</i>	
3-36 Effects of insulation barrier board on power transformer PD detection using acoustics	431
<i>Elliot Sithole Sithole, Aloys Oriedi Akumu and George Kimani Irungu</i>	
3-37 Small Signal Stability Analysis of a four Machine System with Strategic Placement of Monopolar LCC-HVDC link	437

Oluwafemi Oni, Andrew Swanson and Rudiren Pillay Carpanen

3-38 The Impacts of Harmonics Reduction on THD Analysis in HVDC Transmission System using Three-phase Multi-Pulse and higher Level Converters.	444
<i>Peter Gbadega and Akshay Saha</i>	
3-39 Application of Reliability-Centred Maintenance for DC Traction Motors - A Review	450
<i>Mbali Mayisela and David Dorrell</i>	
3-40 Design and Simulation of a Direct Current Distribution System	456
<i>Cornelius Jacobus Van der Merwe, Patrick Manditereza and Pierre Hertzog</i>	
3-41 Effect of Rotor bar Shape and Stator Slot Opening on the Performance of Three Phase Squirrel Cage Induction Motors with Broken Rotor Bars	463
<i>Eveline Makhetha, Mbika Muteba and Dan Valentin Nicolae</i>	
3-42 Operating Induction Machine in DFIG Mode Including Rotor Asymmetry	469
<i>Ahmad A. Salah and David Dorrell</i>	
3-43 Voltage regulation for rural microgrid stabilization using bidirectional AC-AC switch-mode converters	475
<i>Kyle Steyn and Johan Beukes</i>	
3-44 Flyback Converter Controlled by Model-Based Current MPPT for a Photovoltaic Power System	481
<i>Mohammed Dangor, Muhammed Aswat and Willie Cronje</i>	
3-45 A Standalone Personal Consumer Grid for Rural Household Electrification	487
<i>Muhammed Aswat, Mohammed Dangor and Willie Cronje</i>	
3-46 Investigation and Assessment of the Impacts of Reverse Power Flow on Power System Network Loading under High Penetration of Wind Energy	493
<i>Ereola Aladesanmi and David Dorrell</i>	
3-47 Sensitivity of the Electrical and UV imaging methods for Corona Detection Under HVDC Application	499
<i>Herry Sibanyoni, Jerry Walker and Jules Djeumen</i>	
3-48 Determination and Analyses of Available Transfer Capability: Deregulated and Restructured Power Systems Perspective	505
<i>Babatunde Adewolu and Akshay Saha</i>	
3-49 Simulation of Electric Field Effects in High Voltage Insulation Material containing voids	510
<i>Isaac Kwabena Kyere, Jerry Walker and Cuthbert Nyamupangedengu</i>	
3-50 A Study of Spatial distribution of the Electric Field under the Influence of Temperature with DC Supply	513

Jules Simplice Djeumen, Jeremiah Jesaja Walker and Nicholas John West

3-51 Forecasting Solar Power Generation Using Fuzzy Logic and Artificial Neural Network	519
<i>Zesizwe Ncane and Akshay Saha</i>	
3-52 Improved Voltage and Dynamic Performance of Transmission Power Networks Using Distributed Superconducting Magnetic Energy Storage Systems	525
<i>Jamila Kombe, T. M. Bengani and David Dorrell</i>	
3-53 Cathodic Protection System Design Framework	531
<i>Dewald Diedericks, George van Schoor and Eugén Ranft</i>	
3-54 Performance Prediction for an Electric Vehicle.	539
<i>Carel Landman and Arnold Johan Rix</i>	
3-55 Influence of temperature on tan-delta of XLPE cables	545
<i>Adewumi Olujana Adeniyi, Jerry Walker and Cuthbert Nyamupangedengu</i>	
3-56 A hybrid method for high impedance fault classification and detection	549
<i>Katleho Moloji, Jaco Andries Jordaan and Yskandar Hamam</i>	
3-57 A Multilevel Cascaded Converter for a Battery Energy Storage System	554
<i>Macyln Chingwena and Toit Mouton</i>	
3-58 Comparative study of steam vs hot water as primary heat transfer medium for a laboratory scale two-tank heated system	560
<i>Pieter Oberholzer, Kenny Uren, George van Schoor and Willem van Niekerk</i>	
3-59 An Embedded Fuzzy Logic Microcontroller For plant condition monitoring: A Wireless Sensor Network Odyssey	566
<i>Malusi Sibiya and Mbuyu Sumbwanyambe</i>	
3-60 Design Of An Iec61850 Based Substation Automation And Protection Panel	571
<i>Pitambar Jankee and Kehinde Awodele</i>	
3-61 Dynamics of Maximum Power Point Wind Energy Battery Charging Systems	577
<i>Tino Kanda, Lethiwe Mdakane, Casper Labuschagne and Maarten Kamper</i>	
3-62 Influence of Variable Frequency of the Applied Voltage on Cavity Partial Discharge Parameters: A Critical Review	583
<i>Tapiwa Venge and Cuthbert Nyamupangedengu</i>	
3-63 Estimating Installed PV SSEGs on an LV Feeder using Aggregated Load Demand Data	589
<i>Lewis Waswa and Bernard Bekker</i>	
3-64 Development, Testing and Comparison of Smart Fault Location Algorithms for Smart Transmission Grids	594
<i>Neelesh Ramseebaluck and Kehinde Awodele</i>	

3-65 Comparison Between A Three- and Two-Level Inverter Variable Flux Machine Drives for Traction Applications	600
<i>Lesedi Masisi</i>	
3-66 Protection Coordination and Anti-Islanding Control of Grid-Connected PV Systems	606
<i>Ntuba Nkhasi and Akshay Saha</i>	
3-67 Energy management system for a hybrid hydrogen fuel cell-supercapacitor in an islanded microgrid	612
<i>Doudou Luta and Atanda Raji</i>	
3-68 Clustered Wind Resource Domains for the South African Renewable Energy Development Zones	617
<i>Chantelle Janse van Vuuren and Hendrik J Vermeulen</i>	
3-69 A review of contextual frameworks relevant to energy storage on the South African grid	625
<i>Dj de Waal and Bernard Bekker</i>	
3-70 Study the Topology Effect on a G3-PLC based AMI Network	630
<i>Farzad Ghayoor</i>	
3-71 Concentrated Thermal Photovoltaic Power Generation Improvement Through the Use of Three-Dimensional Technology	635
<i>Olufunmilayo Alice Mafimidiwo and Akshay Kumar Saha</i>	
3-72 The HEPSSA Project – A Catalyst for Capacity Building at Durban University of Technology	641
<i>Innocent Davidson</i>	
3-73 Artisan Development and Training: An analysis of the Apprentice, Learnership and ARPL trade test results of candidates tested at TEK-MATION Training Institute	644
<i>Therasinamurthie Govender and Innocent Davidson</i>	
3-74 Bringing Back the Synchronous Compensator for the South Africa Power Network – Simulation and Compensator Technology	649
<i>Christopher Africa, Udochukwu Akuru and Maarten Kamper</i>	
3-75 Monitoring of the service cable PEN conductor to assure bonding using a smart split meter	656
<i>David Scheepers and Johan Beukes</i>	
3-76 Power Tapping from HVDC Link: Utilization of Tap Point Information and Voltage Margin to Ascertain Proximity to Voltage Collapse	662
<i>Agha Francis Nnachi and Josiah Lange Munda</i>	

3-77 Comparative analysis of life estimation and reliability of power transformers	668
<i>Thuthukani Goodwill Maduna, Agha Francis Nnachi, Aloys Oriedi Akumu and Bolanle Tolutope Abe</i>	
3-78 Effect of Input Feature on The Performance of The Ann-Based Wind Power Forecasting	674
<i>Qin Chen and Komla Folly</i>	
3-79 Application of Artificial Intelligence Technique in Predicting 7-Days Solar Photovoltaic Electrical Power	680
<i>Raymond Kene, Daniel Chowdhury and Thomas Olwal</i>
